DAILY FASHION HINTS FROM VOGUE

DISTINCTIVE DAY DRESSES

Especially designed for velvet are these straightened day frocks, which, worn with a gay hat and the smart new fox scarf, make charming and distinctive costumes. Bands of sable may trim the chemise frock at the left, which has gay motifs worked in metal threads, brightening the collar and skirt. Black is perhaps the most favored shade, but there is considerable preference shown for the new red and purple tints which come under the fuchsia shades. Citron, sphinx, gray and dark brown are also featured. The frock at the right compromises between the long and short hemline by dropping its redingote skirt a full three inches below the front panel. The waistline is marked by a chain of gold, silver or jet links.

JOY BROUGHT INTO HOME
By Lydia E. Pinkham's Vegetable Compound, Restoring Mrs. Benz to Health

Altoona, Pa.—"I am writing to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. We have had six children die almost at birth. From one hour to nineteen days is all they have lived. As I was going to have another, I took a dozen bottles of your Vegetable Compound and it is the greatest medicine on earth, for this baby is now four months old and a healthier baby you would not want. I am sending you a picture of her. Everybody says, 'That is a very healthy looking baby.' You have my consent to show this letter."—Mrs. C. W. Benz, 131 3rd Ave., Altoona, Pa.

No woman can realize the joy and happiness this healthy baby brought into the home of Mrs. Benz, unless they have had a like experience. Every woman who suffers from any ailments peculiar to her sex, as indicated by backaches, headaches, bearing-down pains, irregularities, nervousness and "the blues" should not rest until they have given Lydia E. Pinkham's Vegetable Compound a trial.

It is a possibility, however, that in view of big discrepancies in some of the precincts and the outstanding fact that many unauthorized citizens handled the ballots at nearly every precinct in the city, some statement may be made by representatives of some of the candidates, with the object in view of inclining Judge Scott to the alternative of calling for a new election. It was reported around City Hall yesterday afternoon that something of a sensational nature might be injected into the proceedings before Judge Scott announces his findings.

COMMUNITIES CALLED ON FOR WORK DRIVES

principles have been recognized and the recommendations compiled with, we are confident that the public will increase their purchases, thereby increasing the operations of the milk factories and transportation companies, and consequently reducing the number of unemployed.

Specific Recommendations.
Specific recommendations adopted by the conference for emergency relief were: Emergency committees representing the various elements of the communities, to establish public employment agencies and co-ordinate the distribution of work.

Publication by the committees of the numbers dependent upon them for employment and the prevention of uncoordinated solicitation of funds.

Private houses, hotels, offices, etc., to contribute by doing their repairs, cleaning and alterations during the

Corns Ended by a Touch
Pain Stopped Instantly—Corns Removed Quickly and Gently

THIS is the scientific way, the modern way to end corns. A famous expert evolved it. A world-famed laboratory produces and guarantees it.

With millions it has displaced old methods, harsh and crude.

It is Blue-jay—the liquid or the plaster. Either is applied by a touch. The pain stops at once, and soon the whole corn loosens and comes out.

Thus any corn, old or new, can be ended at your will. No joyful hour need ever be spoiled in this way.

Prove this tonight. Get Blue-jay at the drug store. Bid all corns a lasting farewell.

winter instead of in the spring, when employment would be more plentiful. Municipalities to expand their school, street, sewage, repair work and public buildings to the fullest volume compatible with existing circumstances. As indicating the present favorable circumstances the conference noted that over \$700,000,000 of municipal bonds, the largest amount in history, had been sold in 1921.

Governors to unite all State agencies in support of the mayors, and expedite construction of roads, State buildings, etc.

Expedite Building Programs.
Federal authorities, including the Federal reserve banks, to expedite the construction of public buildings and works covered by existing appropriations. Congressional appropriations at the present session for roads to make available employment. It was recommended that Governors of States summon committees to determine the facts and to organize community action in getting adjustments in cost, including removal of freight discriminations, campaigns against combinations, restriction of effort, and unsound practices where they exist, to the end that employment may be fully resumed.

The greatest area for the immediate relief of the unemployment was found by the conference to be in the construction industry, with a shortage of more than 1,000,000 homes affording possibility of employment of more than 2,000,000 persons, if construction were resumed.

"Undue cost and malignant combinations," the program said, "have made proper expansion impossible and contributed largely to this unemployment situation. In some places these matters have been cleaned up. In other places they have not, and are Manufacturers' It was declared, could contribute to relieve the situation by part-time work, through reduced time or rotation of jobs, manufacturing for stock as far as possible, by plant construction, repairs and cleaning up with consequent transfer of many employees to other jobs on the spot through the efforts of the work week to a lower number of days temporarily and reduction of the number of hours of labor per day. Co-operation of employers and employees was urged to make these recommendations effective.

No Move As to Shipping.
No suggestions were made by the committee on mining, shipping and transportation, it being explained that they felt there could be no emergency measures during the present economic conditions.

Adoption of the major parts of its program by the conference was without discussion except upon the unemployment estimate, the conference's estimate of about 1,000,000 on the basis of pay rolls bringing objection from Secretary Davis and provoking a protracted debate, participated in by a number of the delegates, including Samuel Gompers, president of the American Federation of Labor, and Joseph H. DeLoach, president of the United States Chamber of Commerce. An indefinite total was agreed upon as a compromise.

Urban LeDoux, who recently sold labor on Boston common, led an "army of unemployed" numbering about thirty, to the doors of the conference building, where they sang amidst a shower of coins and bills but were not invited to the conference. One of them, however, got a job on the spot through the efforts of Mrs. Sarah Conner, secretary of the United Textile Workers of America, who introduced John Chapman, of Fall River, Mass., to William H. Butler, of Boston, president of a large cotton mill, with excellent results.
